

**Report on Educational Field Visit,
14th November 2022,
Department of Zoology, Kamrup College, Chamata (KCC)**

The Department of Zoology, Kamrup College, Chamata, organized a one-day field visit to **Manas National Park (MNP)** on **14th November 2022**, as part of the course curriculum for **B.Sc. 1st semester (Honours)**. A total of 17 students and four faculties (Teachers in charge), and one non-teaching staff were involved in the group. We started our trip at around 7 AM on that particular day from the College entrance. We visited the Field Director Office of MNP, Simlaguri, Barpeta, where three experts from MNP, namely, Mr. Jyotishman Deka (Field Biologist), Mr. Udipta Deka (Assistant Field Biologist) and Ms. Papari Kachari (FR-I, Security in-charge), provided a series of talks related to the MNP's history, various sampling techniques used, conservation works done at MNP and others. Our students interacted with them through detailed questions & answer sessions. The interaction ended at around 11.30 AM, after which we moved to MNP. We took jeep safaris from the Bansbari range of MNP to visit and experience the forests and wildlife. Inside the MNP, students have observed forest types, and various animal and plant species. We returned from the MNP with some amazing experiences. In addition, students have to submit a report to the department summarising their journey and experiences at MNP.

Three experts of MNP, faculty members in-charge and the students of 1st semester at the Field Director Office, MNP.

Acknowledgements: We, the Department of Zoology, KCC, would like to thank our respected Principal sir, Dr. DK Bezbaruah (KCC), and Field Director, MNP for permitting us to visit the MNP. We are grateful to the experts' team for their valuable time and informative talks, and also to the entire support staff of MNP who have helped us during the programme. Special thanks to Mr. Jyotishman Deka (Field Biologist, MNP), Dr. Pintu Barman (Dept of Physics, KCC) and Mr. Mantul Barman, who have supported us.
